The Northcentral and Northwest Regions of WAPC present:

The Perinatal Symposium

Monday, July 20, 2015, from 9am-4:30pm

at

The Waters of Minocqua in Minocqua, WI

ABOUT THIS SYMPOSIUM
The Wisconsin Association for Perinatal Care Northwest and Northcentral Regional organizations are working together to bring recognized perinatal experts from across Wisconsin to address pertinent and emerging perinatal issues. Symposium attendees enjoy the benefits of learning from multidisciplinary presenters and colleagues who share a common goal—healthy women, infants, and their families.

PURPOSE
The purpose of this symposium is to provide information about advances in perinatal care for all who have an interest in perinatal health.

INTENDED AUDIENCE
This symposium is for everyone who shares an interest in the health of women, infants, and their families—physicians, nurses, public health personnel, social workers, pharmacists, dieticians, therapists, consumers, midwives, administrators, and educators.

OBJECTIVES
At the completion of the conference learners will be able to:
1. Verbalize one change in diagnostic criteria for PIH
2. Describe one anatomical variation in breasts that may affect breastfeeding success
3. Identify one developmental consequence of late preterm infants
4. Identify three interventions immediately initiated for women who have GDM
Perinatal Symposium Agenda

9:00-10:00 a.m.: Gestational Hypertension
Cynthie K. Anderson, MD, MPH, FACOG
Assistant Professor, Medical Director, UW Health Arboretum OB/GYN, University of Wisconsin School of Medicine and Public Health, Madison, WI

Hypertensive disorders in pregnancy are a leading cause of maternal and neonatal illness and death. 2014 was a landmark year, when the American College of OB/GYN issues a Task Force Report on hypertension in pregnancy. This presentation will summarize key criteria recommended by ACOG for the prevention, diagnosis, and treatment of hypertensive disorders in pregnancy.

10:00-11:00 a.m.: The Basics of Breastfeeding
Charlene Galston, RNC-OB, BSN, ME-PD, IBCLC
Staff Nurse and Perinatal Outreach Educator, Black River Memorial Hospital, Black River Falls, WI

This presentation is for the perinatal provider who wants to improve support for women who are breastfeeding their infants. There will be a review of the basic physiology of lactation. In addition, participants will learn how to assist the mother with positioning her infant, assessing latch, and monitoring milk transfer.

11:00 a.m. – 12:00 p.m.: Gestational Diabetes
Kathleen A Kaczmarowski APNP, FNP
Aspirus Endocrinology
Wausau, WI

Gestational diabetes mellitus affects anywhere between 1-14% of pregnancies and has been on the rise due to the obesity epidemic. This presentation will focus on diagnosis, treatment, maternal and fetal morbidity, neonatal morbidity, and what to expect during and after labor for both the mother and baby.

12:00-1:00 p.m.: Lunch and Networking

1:00-2:00 p.m.: Care of the family impacted by substance abuse
Kathleen Elertson DNP, APNP, CPNP
Assistant Professor of Nursing, University of Wisconsin-Oshkosh, WI

Maternal substance use is highly correlated with child neglect. A strength based approach to care, intervention, and family support is needed to increase potential for recovery and resilience. There is a general need to identify the gaps in knowledge and increase the promotion of professional collaboration. This presentation will provide information to the healthcare provider related to the functional assessment and engagement of parents in caring for substance impacted neonates.

2:00-3:30 p.m.: OB/Neonatal Drills: Traci Parlier, RNC-NIC/NPT, BSN, CCEMT-P (neonatal); TBA (OB)

This session will allow hands on opportunities to review neonatal resuscitation guidelines and shoulder dystocia and post-partum hemorrhage drills.

3:30-4:30 p.m.: Late preterm infants
Jody Gross, MD
Marshfield Clinic
Director of NICU Ministry St. Joseph’s Children’s Hospital, Marshfield, WI

This presentation will delineate the issues of the late preterm infant, 34 to 36 6/7 weeks gestation. Issues discussed will be the scope of the problem, the groups at risk for having late preterm infants, and current statistics. Topics included will be the physical issues that these infants encounter (i.e. Poor feeding, hypothermia, sepsis, jaundice, apnea, respiratory distress, and hypoglycemia), what to watch for, and how to support these infants. In particular, supplemental feedings and enriched feedings are discussed, with directions on preparation.
REGISTRATION: The registration fee is $70 for non-members $60 for members. The fee includes a light breakfast (pastries, fruit, juice, and coffee) and lunch (soup and sandwich bar).

For those wishing to reserve a room at The Waters, the rate is $89.99/night. Mention WAPC when registering to receive the discounted rate.

Please fill out the information in the box below, print this page, and send this page and a check to:

CONTINUING EDUCATION
The Wisconsin Association for Perinatal Care is accredited by the Wisconsin Medical Society to provide continuing medical education for physicians. The Wisconsin Association for Perinatal Care designates this live activity for a maximum of 6.5 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

The Wisconsin Association for Perinatal Care is an approved provider of continuing nursing education by the Wisconsin Nurses Association, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation.

This program meets the criteria for a maximum of 6.5 contact hours.

ACKNOWLEDGEMENTS
This symposium is made possible because of a collaborative relationship between the Wisconsin Association for Perinatal Care and the WAPC Northcentral and Northwest Regional Organizations.
